DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ngai (US 5,530,628).

Regarding claim 1, Ngai ('628) discloses a linear light source 141, a linearly formed optical element 139, and at least on diaphragm 157.

Claim Rejections - 35 USC § 103

Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ngai.

Ngai discloses all the limitations of the claims but does not disclose the variable numerical aperture as claimed or the types of finished claimed.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a variable numerical aperture having the compensating according to claim 2 or the type spectral transmission finish or non spectral finish as cited in claim 3-6, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of design preference and the applicant has not discussed the criticality of the claimed elements. *In re Leshin*, 125 USPQ 416.
